ERWIN FABIAN

Recent Sculpture

MEDIA RELEASE

Exhibition Dates: 5 – 22 November 2015
28 Derby Street Collingwood VIC 3066
Open 7 days 10am to 6pm

Erwin Fabian creates powerful, challenging and deeply affecting works from the remnants of scrap metal he collects and allows to age on the studio floor. Throughout his refined process of gleaning and rusting, Fabian arranges and rearranges; contemplating texture and shape to transform previously disjointed elements into meaningful organic forms.

With a career spanning seven decades, Erwin Fabian is one of the most significant sculptors working in Australia today. *Recent Sculpture* presents a new series of works formed from components of welded steel and a selection of works in plastic, varying in tone, texture and scale. This exhibition showcases Fabian's dynamic new body of work, as well as celebrating the significant occasion of the artist's 100th birthday.

Fabian's remarkable ability to find intrinsic connections between discrete fragments of raw material produces artworks that resonate with emotive power. This exhibition is testament to Erwin Fabian's unique creative voice and his significant contribution to Australian sculpture.

Recent Sculpture is current until 22 November 2015
